Minutes of Meeting

Attendees

Bidders/Vendors

- Data Distinct Solution Pvt. Ltd.
- 319 Solutions Pvt. Ltd.
- Trending Technologies Pvt. Ltd.

Centre of Excellence for CPEC, PIDE

- Purchase Committee

A Pre-Bid meeting was held on August 04, 2026 at 11 A.M., with the prospective bidders/firm representatives regarding the subject procurement.

Query

The representatives of M/s Data Distinct Solutions (Pvt.) Ltd. and M/s 319 Solutions (Pvt.) Ltd. requested that the procurement be advertised on an item-wise (lot-wise) basis rather than as a single consolidated package. They submitted that the current bidding document comprises a single lot encompassing below-mentioned items, whereas their respective firms do not hold the requisite Dealer Authorization Form for all items included in the tender.

In this regard, they sought clarification on whether submission of a valid Dealer Authorization Form is required for the following items:

- Advanced External Hard Drive
- Paper Shredders
- Supply and installation of Cat-6 Cable pure Copper
- Supply and installation of 4MP indoor CCTV IP camera's
- Supply and installation of 08 channel NVR with 02TB HDD along with 3U Box

Clarification

The Procuring Agency clarified that the mentioned items constitute ancillary/minor components of the overall procurement package and, therefore, do not warrant segregation into separate procurement lots. It was further explained that splitting these ancillary/minor items into individual lots would not be feasible.

Following detailed deliberations, the Procurement Committee resolved that, in order to promote wider competition and facilitate greater participation of eligible bidders without compromising the technical requirements of the procurement, the requirement for submission of a Dealer Authorization Form in respect of the following ancillary/minor items shall be waived:

- **External Hard Drive** (previously referred to as "Advanced External Hard Drive")
- Paper Shredders
- Supply and installation of Cat-6 Cable pure Copper
- Supply and installation of 4MP indoor CCTV IP camera's
- Supply and installation of 08 channel NVR with 02TB HDD along with 3U Box

All other terms, conditions, eligibility criteria, and technical specifications of the bidding documents shall remain unchanged and shall continue to apply.
